Original input profile MUTOH Wide Color Choice

MUTOH Wide Color Choice
For more vivid *reds* and deeper **blacks**!

Introducing MUTOH Wide Color Choice, an input profile that maximizes color reproduction of inkjet printers! MUTOH Wide Color Choice focuses on dark color areas that were previously difficult to reproduce, expanding the color range. It maximizes the performance of MUTOH inks, enabling printing with even better color reproduction than before.

Japan Color 2001 Coated
MUTOH Wide Color Choice

Newest printing control system that realizes high image quality i-Screen EX System
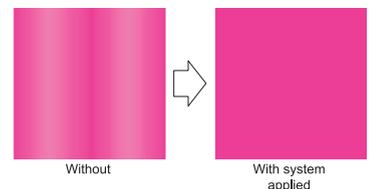

By controlling the screen, you can improve the unevenness of solid dark areas and the streak-like unevenness in the paper feed direction.
